UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

(Company No. 923693-H) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

1.0 Overview

The Pillar 3 Disclosure for financial reporting beginning 1 January 2010 is introduced under the Bank Negara Malaysia's Risk-Weighted Capital Adequacy Framework ("RWCAF"), which is the equivalent to Basel II issued by the Basel Committee on Banking Supervision (BCBS). Basel II consists of 3 Pillars as follows:

- (a) Pillar 1 sets out the minimum amount of regulatory capital that banking institutions must hold against credit, market and operational risks assumed.
- (b) Pillar 2 focuses on strengthening the supervisory review process in developing more rigorous risk management framework and techniques. The purpose is for banking institutions to implement an effective and rigorous internal capital adequacy assessment process that commensurate with the risk profile and business plans of the bank.
- (c) Pillar 3 sets out the minimum disclosure requirements of information on the risk management practices and capital adequacy of banking institution, aimed to enhance comparability amongst banking institutions.

The approaches adopted by Mizuho Bank (Malaysia) Berhad ("the Bank") are shown in the table below:

Risk Type	Approach Adopted	Capital Requirement Assessment
Credit	Standardised Approach	Standard risk-weights
Market	Standardised Approach	Standard risk-weights
Operational	Basic Indicator Approach	Fixed percentage over average gross income for a fixed number of years

2.0 Capital Management and Capital Adequacy

The objective of the Bank's capital management policy is to maintain an adequate level of capital to support business growth strategies under an acceptable risk framework, and to meet its regulatory minimum capital requirements. On top of the minimum regulatory capital requirements, a buffer is added on to arrive at the Bank's internal capital target to ensure adequacy of capital to support the current and anticipated business growth. Internal Capital Adequacy Assessment Process ("ICAAP") is formulated to identify the material risks in the business. The material risk areas that are taken into consideration are credit risk, market risk, operational risk, credit concentration risk, liquidity risk, interest rate risk in banking book, compliance risk, legal risk, strategic risk as well as reputation risk.

(Company No. 923693-H) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

2.0 Capital Management and Capital Adequacy (Continued)

Internal capital assessment is carried out to determine the level of internal capital required by the Bank based on the Pillar 1 and 2 requirements as well as actual results of the preceding financial year (as the base case). Capital plan, business plan and budget are approved by the Board of Directors on an annual basis. The business plan in particular would set out the Bank's risk appetite to be in line with the lending direction and business strategies for the coming year. Senior Management is responsible for ensuring a smooth development and implementation of the ICAAP policy as well as effective systems and processes are in place. The Bank's performance against the internal capital levels is reviewed on a regular basis by the Senior Management.

The Bank undertakes stress test exercise on a half yearly basis to assess the Bank's capability to withstand any adverse environment that may arise. The stress test will at least cover the exceptional but plausible event and the worst case scenario. For the Bank, the stress test is conducted either based on the parameters applied to the current position or using the 3 year business plan projection. The three key segments namely loan growth, deposit growth and profit growth are focused in the 3 year business plan. Impacts on the Bank's potential losses, impairments, liquidity position, earnings and capital ratio is projected based on the selected parameters. With the stress test results that will be communicated to the Board, BRMC and ALMC, the Bank shall identify the key strategies to mitigate the effects of stress events and conserve the capital.

Capital adequacy ratios of the Bank are computed in accordance with BNM's Capital Adequacy Framework. For the year 2018, the minimum regulatory CETI capital ratio, Tier 1 capital ratio and total capital ratio requirement are 6.375%, 7.875% and 9.875% on the risk-weighted assets ("RWA") respectively. The following information presents the capital adequacy ratios of the Bank and the breakdown of RWA:

(a) Capital Adequacy Ratio

	30 Sep	31 Mar
	2018	2018
CET1 Capital Ratio	28.885%	27.651%
Tier 1 Capital Ratio	28.885%	27.651%
Total Capital Ratio	29.979%	28.768%

(Company No. 923693-H) (Incorporated in Malaysia)

3.0 Capital Structure

The components of Tier I and Tier II Capital of the Bank are as follows:

	30 Sep	31 Mar
	2018	2018
	RM'000	RM'000
CET 1 Capital		
Paid-up share capital	700,000	700,000
Retained profits	63,937	66,994
Other reserves	810	1,469
Total CET1 Capital, representing total Tier 1 Capital	764,747	768,463
Tier 2 Capital		
Allowance for credit loss / collective allowance for impairtment		
and regulatory reserve	28,958	31,051
Total Capital	793,705	799,514

4.0 Risk Management Framework

The Board of Directors establishes the Bank's risk appetite and risk principles. The Board Risk Management Committee ("BRMC"), Credit Risk Management Committee ("CRMC") and Asset and Liability Management Committee ("ALMC") have been established by the Board to assume responsibility for the risk oversight and any approved policies and frameworks formulated on Credit, Market, Liquidity and Operational Risk.

Strong risk governance supports Integrated Risk Management ("IRM") approach. The Board of Directors through BRMC is ultimately responsible for the implementation of IRM. Risk Management Department ("RMD") has been principally tasked to assist the various risk committees and undertakes the performance of the day-to-day risk management functions of the IRM.

RMD is responsible for identifying, monitoring, analysing and reporting the principal risks to which the Bank is exposed. In facilitating the Bank's achievement of its objectives whilst operating in a sound business environment, teams from RMD are engaged from an early stage in the risk process for independent inputs and risk assessments. Complementing this is internal audit, which provides independent assurance of the effectiveness of the risk management approach.

The Bank has exposure to the following risks, amongst others, from financial instruments:

- Credit risk
- · Market risk
- Operational risk
- · Liquidity risk

(Company No. 923693-H) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

5.0 Credit Risk

Credit risk is defined as arising from losses when the counterparty which has an lending exposure is unable to meet its obligations as a result of bankruptcy or other circumstances, or when the possibility of such non-performance of obligations increases, resulting in a loss of the value of the assets. The purpose of credit risk management is to keep credit risk exposure to an acceptable level set in accordance with the Internal and BNM requirement under the "Single Counterparty Exposure Limit" (SCEL), "Large Exposure Limit" and "Transaction with Connected Parties".

These limits are monitored on a daily basis to control and prevent the excessive concentration of risk exposure in certain counterparty. In addition, those counterparties for which the judgment is made that these counterparties should be treated with caution from a credit risk perspective are managed on an individual basis.

The credit approving authority is established and documented in the Bank's credit risk policy. The Board of Directors have the approving authority to approve credit facilities above CEO's approval limit. Secondly, the Board of Directors also have the veto power. CEO's approval of credit facilities limit is capped at SCEL limit. There are certain customers and credit facilities will be subjected to Head Office consultation first before obtaining CEO's approval.

The CRMC is set up to enhance the efficiency and effectiveness of the credit oversight. The Committee ensures the overall loan/financing portfolio meets the guidelines of the regulatory authorities and adherence to the approved credit policies and procedures.

Adherence to established credit limits is monitored daily by RMD, which combines all exposures for each counterparty or group, including off balance sheet items and potential exposures. Credit limits are also monitored based on rating classification of the obligor.

The credit rating models for corporate customers are designed to assess the credit worthiness in paying their obligations, derived from risk factors such as financial history and demographics or company profile. These credit rating models are developed and implemented to standardise and enhance the credit decision-making process for the Mizuho Bank Group's corporate exposures. Credit reviews and rating are conducted on the credit exposures regularly and more frequently when material information on the obligor or other external factors come to light.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

5.2 Credit Quality of Loans, Advances and Financing

MFRS 9 accounting standard requires banks to determine an expected credit loss (ECL) amount on a probability-weighted basis as the difference between cash flows that are due to the Bank in accordance with the contractual terms of financial assets and the cash flows that the Bank expects to receive. The ECL model adopted by the Bank covers the on and off balance sheet credit exposures to sovereign, financial institutions and corporate loans. The credit exposures are to be segregated to its three stages, as described below:

Stage 1: Ordinary / Performing Credit Exposure. (12-Month ECL)

Stage 2: Exposure with Significant Increase in Credit Risk. (Lifetime ECL)

Stage 3: Impaired Credit Exposure. (Lifetime ECL)

The general provision / impairment for the credit exposures of the Bank will be equivalent to 12-Month ECL or Lifetime ECL, depending on the stage of credt expoures befitting each financial asset.

All gross loans, advances and financing are neither past due nor impaired as at the following reporting dates:

	30 Sep 2018 RM'000	31 Mar 2018 RM'000
At amortised cost:		
Term loans	3,617,945	4,125,123
Revolving credits	1,565,879	1,697,065
Banker acceptances	8,820	47,800
Bills receivable	13,973	-
	5,206,617	5,869,988
Less: Unearned interest	(79)	(231)
Gross loans, advances and financing at amortised cost	5,206,538	5,869,757
At FVTPL: Term loans	986,734	-
Gross loans, advances and financing at FVTPL	986,734	
Total gross loans, advances and financing	6,193,272	5,869,757
Allowance for impaired loans and financing		
- Collective impairment allowance	-	(31,156)
- Expected credit loss	(31,893)	-
Net loans, advances and financing	6,161,379	5,838,601

(Company No. 923693-H) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

5.4 Credit Risk Mitigation

The Bank undertakes a holistic approach when granting any credit facilities to the customer, such as the credit worthiness of the customer, source of repayment and debt servicing ability, rather than placing primary dependency on the credit risk mitigation.

Depending on a customer's credit standing and the type of product, the facilities may be granted on an unsecured basis. Nevertheless, collateral serves as an effective tool in mitigating the credit risk.

The collaterals taken by the Bank consist of cash and corporate guarantee. Before any of the collaterals are accepted by the Bank, it has to be assessed in terms of legal enforcebility. In all relevant jurisdiction, recognition of eligible collateral and to have the rights to liquidate or take legal possession of the collateral in a timely manner in the event of default.

The application of haircut takes place whenever there is a currency mismatch between customer exposure and collaterals, as it serves as a protection for the Bank against the foreign currency fluctuations.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

5.5 Assignment of Risk Weights for Portfolios Under The Standardised Approach

The Bank refers to the credit ratings assigned by credit rating agencies in its calculation of credit risk-weighted assets. The following are the External Credit Assessment Institutions ("ECAI") ratings used by the Bank and are recognised by BNM in the RWCAF:

- (a) Standard & Poor's Rating Services ("S & P")
- (b) Moody's Investors Service ("Moody's")
- (c) Fitch Ratings ("Fitch")
- (d) RAM Rating Services Berhad ("RAM")
- (e) Malaysian Rating Corporation Berhad ("MARC")
- (f) Rating and Investment Information, Inc. ("R&I")

The ECAI ratings accorded to the following counterparty exposure classes are used in the calculation of risk-weighted assets for capital adequacy purposes:

- (a) Sovereigns and Central Bank
- (b) Banking Institutions
- (c) Corporates

Rated and Unrated Counterparties

In general, the issue rating i.e. the rating specific to the credit exposure is used. When there is no specific rating available, the credit rating assigned to the issuer or counterparty of the particular credit exposure is used. In cases where an exposure has neither an issue or issuer rating, it is deemed as unrated.

Where a counterparty or an exposure is rated by more than one ECAI, all available external ratings of the counterparty will be captured and the following rules will be observed:

- Where 2 recognised external ratings are available, the lower rating is to be applied; or
- Where 3 or more recognised external ratings are available, the lower of the highest 2 ratings will be used for the capital adequacy calculation purposes.

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

6.0 Market Risk

Market risk is defined as the risk of potential losses on the values of assets and liabilities held (including off-balance sheet items) arising from the movements in market variables, such as interest/profit rates, foreign exchange rates, securities prices, futures prices.

Broadly, the Bank is exposed to two major types of market risk namely interest/benchmark rate risk and foreign exchange risk. The Bank manages those market risks by transferring the risk to another party such as entering into a back-to-back deal with external counterparties. This reduces the negative effect or probability of the risk through offsetting positions of a particular risk.

RMD controls the exposure by setting the limits which is in accordance to Head Office. RMD monitors the exposures through Foreign Exchange Position Limit, Interest Rate 10 Basis Point Value ("BPV") and Foreign Exchange Positions 10BPV and Loss Cut Limit. These position limits are monitored on a daily basis and changes in market value of the Bank's treasury portfolio due to interest rate and foreign exchange movements are reported to the CEO.

The Bank's market risk and liquidity risk position are discussed and managed at the Asset Liability Management Committee ("ALMC") on a monthly basis and the Board Risk Management Committee ("BRMC") on a quarterly basis, which is in line with the approved guidelines and policies.

Interest Rate Risk Management

Interest rate risk is defined as the exposure of a bank's financial condition to the adverse movements in interest rates. Interest rate risk arises from the mismatch of maturity date and repricing date of the bank's assets, liabilities and off-balance sheet items, as a result to the changes in interest rates related to the shift in yield curves and repricing patterns.

Foreign Exchange Risk Management

Foreign exchange risk arises as a result of the movements in exchange rates, which affects the bank's profit and capital from the open position in foreign currencies. Currently the bank executes the transactions on a back-to-back basis to minimize its exposure to the fluctuations in exchange rate.

(Company No. 923693-H) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE **30 SEPTEMBER 2018**

6.0 Market Risk (Continued)

The following tables present the minimum disclosure on regulatory capital requirements on market risk:

1 0101811 00110110 11011	472	-	5,899	4/2

7.0 Liquidity Risk

Liquidity Risk forms part of Market Risk and is defined as the risk that the Bank will be unable to secure necessary funding due to deteriorating financial condition or a similar reason, and will therefore be unable to meet cash flow requirements, or that it will suffer a loss because it is compelled to pay interest rates significantly higher than normal rates to secure funding.

RMD monitors its cash-in and cash-out positions on a daily basis. The funding gap is used as a tool to monitor and control liquidity risk exposure. This is to ensure that the Bank maintains sufficient amount of liquidity buffer as a protection against any unforeseen interruption to cash flow.

RMD conducts rehearsal for local currency regularly to ensure the effectiveness and operational feasibility of the Liquidity Contingency Plan. The key aspects of the testing are to focus on the preparedness of the Bank in handling a simulated distress funding situation. It also provides exposure and develops capabilities on how to respond to a liquidity crisis situation and operate effectively with each other under challenging circumstances.

(Company No. 923693-H) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

8.0 Interest Rate Risk in the Banking Book ("IRRBB")

The projection, by using the repricing gap method, assumes that interest rate moves up and down parallelly by 100 basis points ("bps") across all maturities for all the interest bearing assets and liabilities. It is further assumed that all positions are repriced at the mid-point of each time band and will run to maturity. The repricing profile of any loan that does not have maturity is based on the earliest possible repricing dates. The impact on earnings and economic value is measured on a monthly basis.

The table below illustrates the impact under a 100 bps parallel upward and downward interest rate shock on the Bank's earnings and economic value.

	30 Sep 2018		31 Mar 2018

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

9.0 Operational Risk

The Bank defines operational risk as the risk of loss that it may incur resulting from inadequate or failed internal processes, people and systems, or from external events. The following risk categories are included in the Bank's definition of operational risk.

(i) Execution Risk

which encompasses situations where trades fail to be executed, due to dealing, processing, settlement, or reconciliation problems, at times leading to costly delays or penalties.

(ii) People Risk

which encompasses the risk of human errors/omissions, frauds by staff or external persons and mishaps involving key personnel.

(iii) Systems Risk

which is the risk of disruption to operations arising from systems failures, unauthorised intrusion or tampering of systems.

(iv) Model Risk

which represents the risk that incorrect raw data, assumptions and hypotheses will result in erroneous output from the model constructed/used.

As part of initiatives to improve operational risk management, "Control Self-Assessments" ("CSAs"), is implemented every six months to all departments to identify operational risk issues in the departments to reduce such risk. "Key Risk Indicator" ("KRI"), also being implemented on a monthly basis to reduce operational risk.

(Company No. 923693-H) (Incorporated in Malaysia)

UNAUDITED PILLAR 3 DISCLOSURE 30 SEPTEMBER 2018

CHIEF EXECUTIVE OFFICER ATTESTATION

In accordance with Bank Negara Malaysia's Risk Weighted Capital Adequacy Framework (Basel II) – Disclosure Requirements (Pillar 3), I hereby attest that to the best of my knowledge, the disclosures contained in Mizuho Bank (Malaysia) Berhad's Unaudited Pillar 3 Disclosure report for the financial period ended 30 September 2018 are consistent with the manner the Bank assesses and manages its risk, accurate, complete and not misleading in any particular way.

Shojiro Mizoguchi Chief Executive Officer

Date: 31 October 2018
