[Investment Climate]

Geographical and Social Conditions	<p>Jilin Province lies adjacent to Heilongjiang Province to the north, the Inner Mongolia Autonomous Region to the west, and Liaoning Province to the southwest. The southeast part of the province borders on Russia and North Korea.</p> <p>It has a temperate continental monsoon climate. The climate in the mountainous eastern part is relatively mild and humid, and the western part, which is near the Mongolian Plateau, is dry. A characteristic of this region is that strong winds above Level 10 on the Beaufort scale occur often, creating sandstorm-like conditions.</p> <p>The province is multiethnic, with large populations of Koreans, Mongolians, and Manchurians. Approximately one-fifth of the eastern part is Yanbian Korean Autonomous Prefecture, and there are also Mongolian and Manchurian autonomous counties.</p>	
Resource Distribution	<p>The province is one of the six major forested areas in China, and approximately 40% of the province is forested.</p> <p>In the mountainous eastern region, there is an abundance of organic medicines such as ginseng. The eastern part has abundant water resources. In addition to the Yalu River and the Tumen River, which mark the border with North Korea, the Songhua River flows from Jilin Province to Heilongjiang Province. Meanwhile, water resources are lacking in the central and western parts, which are arid regions.</p> <p>The reserves of oil and natural gas in the province rank among the largest reserves in China. The province has over 15% of the country's oil shale reserves.</p>
