Financial year to March 2003	-50,627	-1,065	1,951	40,260

(4) Scope of full consolidation and partial consolidation under the equity method:

Number of fully consolidated subsidiaries: 14

Number of non-consolidated subsidiaries under the equity method: --

Number of equity-method affiliates: 5

(5) Changes in scope of consolidation and application of the equity method:

Consolidation: No company was added or removed.

Equity method: No company was added or removed.

2. Forecast of consolidated business results for the full financial year ending 31 March 2005 (1 April 2004 - 31 March 2005):

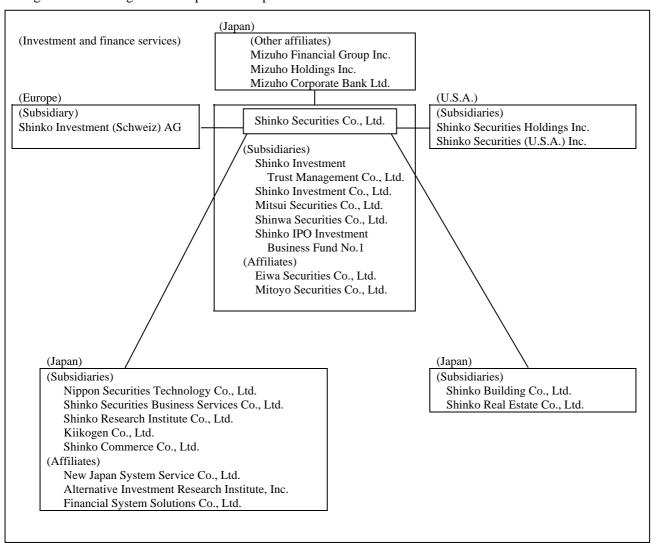

Because the main business activity of our corporate group is the buying and selling of securities, our earnings are strongly influenced by market conditions, etc. For this reason, we do not conduct forecasts of our business results.

Our Corporate Group

Our corporate group is composed of 15 subsidiaries and 5 affiliates. The business activities of our company and of 8 of the subsidiaries and 2 of the affiliates consist mainly of trading securities, the commissioning of securities trading, the underwriting and selling of securities, offering and selling of securities, handling of private offerings, and other securities- and finance-related activities, as well as a wide range of services in the areas of raising and operating funds for customers. The other companies provide services related to and supportive of our company's activities, conduct market surveys and research, manage real estate, and more. Therefore, our corporate group's business activities all come under the single business segment of "investment and financial services."

All of our subsidiary companies, except Shinko IPO Investment Business Fund No. 1, are consolidated companies, and the equity method is applied for all of our affiliated companies.

Organizational Diagram of Corporate Group

[Business Policy]

1. Basic Business Policy

Our corporate group's main field of business is the securities industry and related areas. In this field we provide a full line of services as a general securities company having multiple, integrated departments. As a securities company in the Mizuho Financial Group, moreover, we aim to maximize the synergy between group members and their departments, thereby providing high-value added financial service to a wide range of customers, from retail to wholesale customers.

2. Basic Policy Regarding Profit Distribution

Our company's main goal is to maximize corporate value. Our basic policy with regard to profit distribution is to provide a variable dividend, based on the results in the period in question.

3. Medium- and Long-Term Business Strategy

Our company has finalized our Third Medium-Term Business Plan which came into effect from April of this year. Current signs suggest that Japan's long-term recession and deflationary spiral may be coming to an end. Our Medium-Term Business Plan will guide our efforts towards significant business expansions which capitalize on the movements in the equity market as investors attempt to pre-empt the economic upturn. The essence of the plan is outlined below.

- Third Medium Term-Business Plan (April 2004 - March 2006.) (Medium Term-Business Policy)

In order to firmly establish our position as the leading corporate group in the industry, it is essential for us to maximize the merits of our full range of services. We must expand our middle-retail customer base, pursue improvements in functionality and effectiveness in our corporate division, and further strengthen our products department which supports our customer departments.

(Basic Principles)

- ➤ Evolve into the Securities Company which best serves society.
 - Aim to provide the highest standards of product quality
 - Contribute to the vitality of the capital markets
 - Be a warmhearted organization

4. The Year's Business Goals and Their State of Achievement

In this financial year, which marks the final period of our Second Medium-Term Business Plan, we aimed to consolidate our basic principle to "build a business foundation on which stable profits can be obtained in any business environment" by expanding our sales base and reforming our profit structure. Our Retail Division, undertook a customer-focused "Sales Restructuring Project", through which they worked towards the provision of services, product and information relevant to each individual customer. The project achieved a diversification in our product portfolio and an increase in sales revenue, making progress in alleviating our dependence on stocks and moving towards a more stable profit structure. By reforming the style of our person-to-person sales, and strengthening the capabilities of our non person-to person channels, such as the Shinko Net Club Internet service and our call-center, we believe we have achieved synergies between these three support services. In addition, to make effective use of our sales base, and to provide group customers with a comprehensive range of high quality financial services, we have opened our first joint branch office with the premises of Mizuho Bank's Central Marunouchi branch in Tokyo.

Our Wholesale Division has aimed to build a profit structure which is not unduly affected by market fluctuations, and have concentrated their resources into the expansion of the investment banking business. In the underwriting business, our company group has maintained its position as the top lead manager and underwriter of IPOs in the three emerging equity markets. In addition we have also steadily expanded our share as an underwriter of public offerings. Further, in the bond market, we have maintained a high market share of underwritings for corporate bond issues aimed at individual investors, as our joint sales operation with Mizuho Securities has steadily increasing our presence, not just in the middle market where we have historically been strong, but also in the Wholesale Division. This has also played a significant role in providing products for the Retail Division.

In the Products Division, at the same time as aiming to increase profitability through the strengthening of trading and dealing operations, efforts have been made to respond rapidly to customers' needs for more diverse and advanced products through over-the-counter transactions such as options transactions and the lending and borrowing of stock certificates, and the appropriate provision of foreign bonds and publicly offered structured bonds.

Turning to cost reductions, the company has reduced personnel costs through soliciting voluntary early retirement, integrating four branch offices in close proximity to other branches, and consolidating various headquarter functions. In addition, we have taken other measures including starting the operation of a new system to improve operational efficiency, and the upgrading of our transaction settlement system. We have also achieved a certain degree of cost cutting efficiencies through revisions of our real estate and administrative expenses. Due to the above results achieved through the execution of various policies outlined in our Second Medium-Term Business Plan and the

upturn in the stock market, we intend to ask the scheduled Annual General Meeting of Shareholders to approve a five yen dividend. A five yen dividend corresponds to the target amount stated Second Medium Term Business Plan, which was one of the major management issues for this financial year.

5. Our tasks to be solved

In the Japanese security market, the investing environment has become more favorable due to the rapid recovery in corporate earnings. In addition, due to developments in direct financing and the increasing numbers of banks introducing their clients to security firms with a view to going public, and systemic changes which have lead to greater liquidity of individuals financial assets, it is expected that large amounts of capital will flow into the market, and the securities industry will expand further. In this business environment, in order that our customers can experience high levels of satisfaction from their involvement with securities markets, we carry out strict quality control over our products, staff, information and settlement systems. By providing customer will reliable high performance, we intend contribute to the vitality of the security markets and the regeneration on Japanese corporations and the Japanese economy, and continue to develop into a securities company with a prominent role in society.

6. Numerical Goals

Our Third Medium-Term Business Plan outlines the following targets: (1) ROE of over 10%; (2) An increase of over 15% in net operating revenue; (3) Profit margins that rank among the top group of companies in the industry; (4) Eight trillion yen of assets deposited by retail customers (as of the end of fiscal 2005); (5) 1.25 trillion yen of assets deposited through equity investment trust (as of the end of fiscal 2005)

7. Basic Approach to Corporate Governance and the State of Implementation of Related Measures (Basic Approach to Corporate Governance)

We are aware that, in business management today, promptly dealing with changes in the business environment, and making decisions and undertaking organizational efforts that are both appropriate and timely, are what constitute the key to future corporate growth. Recognizing the importance of increasing managerial speed, of ensuring the transparency of corporate activities, and especially of increasing disclosure and accountability to shareholders, our company has undertaken various measures aimed to improve our corporate governance.

(The State of Implementation of Measures Related to Corporate Governance)

Our company is one that uses an auditor system. With regard to our current corporate governance system, we have two types of management decision making bodies: a board of directors, which is required by law; and a management committee, which is composed of the company's directors and those executive officers who are in charge of the company's main operations. Based on the "Board of Directors Rules," the board of directors makes decisions about legal matters and matters related to the administration of especially important operations. Based on the "Management Committee Regulations," the management committee discusses and decides on administrative matters other than those decided by the board of directors. In addition, there are four auditors (two from outside the company: an officer of an affiliated company, and an individual with experience as an officer of another company) who provide advice and suggestions to the board of directors.

At the end of this financial year (March 31, 2004) there were six directors, comprising of three representative directors and three directors who also serve as executive officers. There are no external directors.. Moreover, there are 27 executive officers (in addition to the three director/executive officers). Executive officers are appointed by the board of directors; their positions as executive officers are based on commissioning contracts; and their term of office, like that of directors, is, as a rule, two years. Under the control and supervision of the company president, executive officers administer those operations entrusted to them by decision of the board of directors. The titles of executive officers include Senior Managing Executive Officer, Managing Executive Director, and Executive Officer.

Introducing a system of executive officers has made it possible to greatly reduce the number of directors, which in turn has had the effect of invigorating debate on the Board of Directors and strengthening the Board's decision-making function and business oversight function. In addition, it has enabled executive officers to execute, with greater dispatch, the duties of which they are in charge.

8. Basic policies regarding our relationship with affiliated entities (parent company, etc.)

The Mizuho Bank owns 11.05% of the voting stock of the company; the Mizuho Corporate Bank also owns 11.05%; and the Mizuho Securities owns 5.28%. These three companies thus own a combined 27.39% of the voting stock. At the same time, the Mizuho Securities Company is a fully owned subsidiary of the Mizuho Corporate Bank; the Mizuho Corporate Bank and the Mizuho Bank are fully owned subsidiaries of Mizuho Holdings; and Mizuho Holdings is a fully owned subsidiary of the Mizuho Financial Group. Accordingly, of each the Mizuho Financial Group, Mizuho Holdings and the Mizuho Corporate Bank, our company is a consolidated company to which the equity method applies.

Our role in the Mizuho Financial Group is to utilize our strengths as a full-line securities company to contribute, through our ties with the Group, to the Group's underwriting strategy, product strategy, sales strategy, etc.; in addition, we contribute to the Group by cultivating customers and business ties outside the Group, thereby expanding the Group's customer base and strengthening its profit structure. In the area of personnel, we invite officers from affiliates to our company, and temporarily transfer mid-level managers of ours to affiliates, so as to improve our staff and thereby strengthen our administrative organization.

[Business Performance and Financial Position]

1. Business Performance

During the current financial year, the Japanese economy continued to recover slowly, supported by a rally in exports caused by economic recovery overseas, and an increase in capital investment brought about by improved corporate profits. In particular, since the beginning of the calendar year, the beneficial effects of improved business conditions at large corporations have spread to small and medium sized businesses, and the scope of economic recovery has widened. The stock market began the year in turbulent fashion, as in late April 2003 the Nikkei Stock Average falling to its lowest level since the end of the Bubble Economy. However, as concerns about the health of the financial system decreased and expectations of a recovery in the overall economy and in corporate profits grew, foreign investors lead a rebound in the market, and stock prices continued to rise through almost the entire financial year. As the end of the financial year approached, and expectations grew that Japan would break out of its deflationary spiral, market growth accelerated, centered around those stocks which rely heavily on Japanese domestic demand, bringing the Nikkei Stock Average up to within sight of 12,000 yen. In the bond market, stock price rises going into the summer and a fall in levels of anxiety about global deflation led to some negative price adjustments. However after adjustments to Japan's extremely low interest rates, activity in the bond markets continued, centered around Japanese domestic financial institutions, although movement was confined within a narrow range.

Outside Japan, the speed of economic recovery in the U.S. accelerated as of the middle of this financial year, centered around growth in consumption and capital investment, as the war in Iraq ended and the effects of government policy became more pronounced. The European economy also gradually began to show signs of recovery, spurred on by a rally in exports. The U.S and European stock markets continued to show solid growth, led by U.S. stocks, as the war in Iraq ended and expectations mounted of a recovery in the overall economy and corporate profits. However, from the beginning of the calendar year, as concerns about international terrorism increased and investors began to worry about the recovery of the U.S. job market, the market suffered some downward adjustments. In the bond market, although there was also some brief negative movements in the U.S., the continuing underlying stability of minimum prices and the expected longevity of low interest rate policies prevented further downward movement.

Against this background, our corporate group earned consolidated operating revenues of 114.967 billion yen (143.2% of the previous year), an ordinary profit of 22.643 billion yen, and a net profit of 15.614 billion yen. A brief breakdown of these results follows:

(1) Commissions and fees received

Commissions and fees received during this year totaled 65.896 billion yen (144.4%). A breakdown of this income follows:

- Brokerage commissions

The average daily turnover during this year in the sections 1 and 2 of the Tokyo Stock Exchange was 1.1579 trillion yen (157.2%). Our company brokered the sale of 10.381 billion shares of stock (172.4%) worth 6.8086 trillion yen (171.6%), while our commissions on the same totaled 37.878 billion yen (186.1%). Commissions earned on bond brokering totaled 263 million yen (51.2%).

- Underwriting and selling fees

In this financial year, we underwrote the offering and sale of shares issued by 85 newly floated companies. We lead managed 19 of these cases. We were also served as an underwriter for the offering and selling of stock from 99 already-listed firms, and were lead manager for 17 of these firms. As a result, income for underwriting and selling fees was 4.315 billion yen (190.2% of that for the previous year).

Regarding bonds, while we continued to concentrate our efforts in underwriting government guaranteed bonds and municipal bonds, we also lead managed issues of two issues of FILP institution bonds and 13 issues of industrial bonds. As a result, income from underwriting and selling fees for bonds totaled 1.003 billion yen (81.7%).

- Offering, selling, and other fees and commissions

This income is made up chiefly of fees and commissions we earn selling investment trusts to our customers and service commissions.

In this financial year, against the background of the long-term application of an extremely low interest rate policy, distributed investment trusts increased at all securities companies (including banks selling securities). In this climate, our company also began to concentrate our efforts in the distributed investment trust market, launching a new fund dubbed the "IG Fund" that invests in investment-grade foreign corporate bonds, an open-end income fund from DIAM named "Happy Clover" that purchases only very highly rated issues and pays out returns on a monthly basis and the "Australia Real Estate Investment Trust Portfolio" a fund denominated in Australian dollars.

Regarding equity products, we also launched closed-end type investment trust funds including an Australian-dollar denominated fund that partially tracks the movement of the Nikkei 225 index, and a fund of Japanese stocks managed by Shinko Investment Trust Management Co., Ltd, and open-end investment funds including a DIAM-managed open-end China-related equity fund nicknamed "Chinese Angel", and an open-end fund dealing in small-cap stocks nicknamed "Nami-monogatari". The sale of these products, alongside existing stock funds such as a small-cap stock fund nicknamed "Growing Up", and "Shinko China Open" allowed us to provide products which meet the demands of current market conditions.

Regarding domestic public and corporate bonds investment trust, we launched four new public and corporate bond unit trusts that are managed by Kogin Daiichi Life Asset Management and aimed at addressing the problem of declining returns from public and corporate bond funds.

These moves allowed us to earn handling commissions for offering and selling of 9.437 billion yen (112.0%), and other fees and commissions of 12.924 billion yen (101.7%).

(2) Trading profits

This year saw us earn trading profits of 15.55 billion yen (329.2%) on equity trading, and 31.281 billion yen (123.1%) on the trading of bonds, foreign currency and other instruments. Total trading profits thus stood at 46.831 billion yen (155.4%).

(3) Financial balance

Deducting financial expenses of 4.483 billion yen (123.0%) from financial revenues of 1.93 billion yen (43.2%) gives a negative financial balance of 2.552 billion yen.

(4) Sales and general administrative expenses

Although expenses for personnel expenses including expenses for performance related pay, and expenses for outsourcing system development increased, transaction related costs and real estate related cost decreased, reducing sales and general administrative expenses for this financial year to 90.092 billion yen (97.9%).

(5) Extraordinary profits and losses

We recorded extraordinary profits of 1.763 billion yen on factors such as gains on the sale of investment securities. However, we recorded extraordinary losses, including loss from sale of fixed assets of 3.789 billion yen, and write-down of investment securities holdings of 1.374 billion yen. Overall, we recorded an extraordinary loss of 6.226 billion yen.

2. Financial status

Factors such as a reduction in holdings of trading products meant net cash provided in operating activities was 1.758 billion yen.

Net cash used in investing activities totaled 7.631 billion yen on factors such as an increase in investment in new system.

Financing activities provided net cash of 75.539 billion yen on factors such as an increase in short-term loans proceeded from call money.

As a result of these flows, the balance of cash and cash equivalents stood at 109.557 billion yen at the end of this year.

[Consolidated financial statements]

These consolidated financial statements follow the provisions of Ministry of Finance (MoF) Ordinance No.28 (1976) entitled "The Rules for Terms, Formats, and Preparation Method of Consolidated Financial Statements" and also comply with the provisions stipulated in Articles 46 and 68 of said ordinance. In addition, they are compiled in accordance with Prime Ministerial and MoF Ordinance No.32 (1998) entitled "Cabinet Ordinance Concerning Securities Companies" and the resolution entitled "Unification of Securities Business Accounting" adopted by the Japan Securities Dealers Association on 14 November 1974.

[Basic Important Matters for Preparation of Consolidated Financial Statements]

- 1. Matters regarding the scope of consolidation
 - (1) Consolidated subsidiaries (14 subsidiaries)

Major subsidiaries

Nippon Securities Technology Co., Ltd.

Shinko Securities Business Services Co., Ltd.

Shinko Investment Co., Ltd.

Shinko Investment Trust Management Co., Ltd.

(2) Non-consolidated subsidiaries (1 subsidiary)

Shinko IPO Investment Business Fund No.1

2. Matters concerning the application of equity method

Equity-method affiliates (5 affiliates)

Major affiliates

Mitoyo Securities Co., Ltd.

Eiwa Securities Co., Ltd.

3. Matters concerning the period of consolidated subsidiaries

The closing date of consolidated subsidiaries coincides with the consolidated closing date.

- 4. Matters concerning the accounting standard
 - (1) Valuation method for significant assets
 - Valuation method for securities classed as trading products (securities held for trading purpose):
 Securities and derivative contracts classed as trading products and held by the parent company or subsidiaries are recorded at present market value.
 - 2) Valuation method for securities not classed as trading products:

The following valuation methods are applied to securities that are not held for trading purposes:

a) Bonds that are to be held to maturity.

The depreciable cost (straight-line) method is used.

b) Other securities

Securities, etc. that have market values:

The present market value is recorded on the consolidated balance sheets and differences between this and acquisition cost is incorporated into the capital account in full. The selling price is based on the moving-average cost method.

Securities, etc. that have no market values

Valued using the moving-average cost method.

- (2) Depreciation methods used for significant depreciable assets
 - 1) Tangible fixed assets

Both our company and domestic consolidated subsidiaries use mainly fixed-percentage depreciation. However, buildings acquired after 1 April 1998 (excluding the equipment, etc. they contain) are depreciated using the straight-line (fixed amount) method.

2) Intangible fixed assets and long-term prepaid expenses

The straight-line method is used.

Moreover, software for our own use is depreciated using a straight-line method with the fixed amount of depreciation being determined by the duration of its potential internal use (up to 5 years).

(3) Handling of significant lease transaction

In the case of finance leases where ownership is not deemed to have passed to the lessee, normal accounting procedures for leases are followed.

(4) Accounting standards for significant reserves and allowances

1) Allowance for bad debts

In preparation for loss from bad debt in loans receivables, etc., the recoverable possibilities of general receivables are reviewed based on the ratio of past uncollectibles and those of specific receivables including the ones that are likely to become bad debts are individually reviewed, so that the irrecoverable amount can be estimated.

2) Reserve for bonus

To prepare for the payment of bonuses to employees, we calculated the estimated value of future payments and charged this obligation to this year.

3) Reserves for retirement benefits

To prepare for the payment of lump sum retirement bonuses and qualified pensions, the difference between the value of such obligations and the total value of our pension assets at the end of this financial year was estimated, and the portion of the additional shortfall considered to have arisen in this year was charged to this year.

The difference at the change in the accounting method (8.454 billion yen) will be amortized in straight-line method over 5 years, and the amount appropriated to this year is included in the extraordinary loss.

Past service liabilities are regarded at any time as being a number of years (10 years) that fall within the average number of years' service remaining for each employee. These liabilities are amortized and charged to this year for which it was calculated using the straight-line method.

Actuarial gains and losses are also charged after amortizing by the straight-line method a number of years (10 years) that fall within the average number of years' service remaining for each employee. However, in this case, the charges are recorded in the following consolidated financial year.

(5) Standards for translating significant assets and liabilities denominated in foreign currencies

Foreign currency denominated claims and obligations are translated into Japanese yen at the spot rate prevailing on the day the consolidated balance sheet was prepared. Currency translation losses or gains are recorded on the income statement as such.

The assets, liabilities, revenues, and expenses of foreign subsidiaries are also translated into Japanese yen at the spot rate prevailing on the day the consolidated balance sheet was compiled. Any translation losses or gains are recorded in the capital account under the heading "Foreign exchange translation adjustment".

(6) Method of significant hedge accounting

In order to hedge our exposure to cash flow fluctuations caused by borrowing at variable interest rates, we enter into interest rate swap contracts. These are handled on a case-by-case basis.

(7) Accounting for consumption tax, etc.

The tax exclusion method is applied.

5. Valuation of assets and liabilities of consolidated subsidiaries

The valuation of asset and liabilities of consolidated subsidiaries is carried out entirely on a mark-to-market basis.

6. Amortization of the consolidation adjustment account

This account is amortized in the lump for the year when it occurred.

7. Matter concerning the handling of profit appropriation and the like

Regarding the disposal of surpluses at consolidated companies, the consolidated statement of earned surplus is compiled based on the appropriation of surpluses that have been determined during that consolidated financial year.

8. Scope of cash and cash equivalents included in the consolidated cash flow statement

The cash movements recorded in the consolidated cash flow statement are those of cash and cash equivalents. Assets classed as cash or cash equivalents are cash on hand, deposits for which no notice of withdrawal is required, and highly liquid short-term investments that carry next to no price risk and have a maturity of less than three months.

[Notes on consolidated bala	ance sheets1
-----------------------------	--------------

	Financial year to 31 March 2004	Financial year to 31 March 2003 (In millions of yen)
1. Accumulated depreciation of tangible fixed assets	23,129	20,989
2. Guarantee obligations (guarantee exercise anticipated)	2,786 (2,632)	3,670 (3,426)

In accordance with Report No.61 of the Auditing Committee of the Japanese Institute of Certified Public Accountants entitled "Auditing Procedures Concerning the Accounting for and Presentation of Guarantee Obligations and Similar", we recognize that we bear effective responsibility for guaranteeing our obligations and therefore provide a footnote giving details of these obligations.

3. Subordinated borrowings

Among our long-term borrowings (including those that mature within one year), there are the following subordinated obligations (borrowings with special subordinating conditions) as defined in Article 2 of Cabinet Office Ordinance No.23 (2001) entitled "Orders Concerning the Capital Requirement of Securities Companies".

Segment Information

1. Business segment information

This corporate group is carrying out global business activities mainly for securities, which include (1) selling and buying securities, (2) intermediation of brokerage of selling and buying securities, etc., (3) underwriting and selling securities, (4) handling the offering and selling of securities, and (5) handling the private offering of securities. These business activities involve providing financial and other services. We earn profit based on these business activities combined with such services. Therefore, the segment information on business types is omitted because our corporate group's business activities all come under the single business segment of "investment and financial services."

2. Geographical segment information

For this financial year and the previous financial year, the segment information on locations is omitted because each of the total operating revenue and assets of consolidated companies in Japan exceeds 90% of those in all segments.

3. Overseas gross sales (operating revenues)

For this financial year and the previous financial year, the overseas operating revenue is omitted because it is less than 10% of the consolidated operating revenues.
