Summary of Financial Statements for the Financial Year Ended 31 March 2008

Listed company's name: **Shinko Securities Co., Ltd.**Listed on: 1st sections of TSE, OSE, NSE

Code No.: 8606 Location of head office: Tokyo

(URL: http://www.shinko-sec.co.jp/index_e.html) Representative: Takashi Kusama, President

Contact: Akihiko Furuta, General Manager of Treasury Dept. at (03) 5203-6000

The annual general meeting of shareholders will be held on 27 June 2008.

Dividend payments are scheduled to start on 30 June 2008. The financial report is scheduled to submit on 27 June 2008.

(Note) The amounts displayed below have been rounded off downwards to the nearest million yen.

1. Summary of consolidated business results for the financial year ended 31 March 2008 (1 April 2007 to 31 March 2008)

(1) Consolidated results of business activities

(Percentage figures represent the percentage increase/decrease on the previous year.)

	Operating revenues		Net operating revenues		Operating profit		Ordinary profit	
	mil. y	en %	mil. ye	en %	mil. y	en %	mil. y	en %
Financial year to March 2008	146,514	(-0.2)	128,666	(-5.6)	12,223	(-48.6)	14,633	(-49.6)
Financial year to March 2007	146,794	(-4.0)	136,319	(-8.2)	23,786	(-39.4)	29,056	(-32.7)

	Net profit	Net profit per share	Net profit per share (diluted)	Return on Equity (ROE)
	mil. yen %	yen	yen	%
Financial year to March 2008	9,404 (-57.1)	12.16	12.15	3.4
Financial year to March 2007	21,935 (-37.3)	28.45	28.38	7.8

Equity (i.e. "Shareholders' equity" and "Valuation and translation adjustments"):

As of 31 March 2008: 264,494million yen

As of 31 March 2007: 274,465 million yen

2. Forecast of non-consolidated business results for the full financial year ending 31 March 2009 (1 April 2008 - 31 March 2009)

Because the company's earnings are strongly influenced by market conditions, we do not conduct forecasts of our business results.

I. Business Results

1. Analysis of business results

The Japanese economy continued growing steadily during the fiscal year ended March 31, 2008, as a result of robust exports and capital investment and a continued gradual recovery in consumer spending. However, signs of deceleration in the economy appeared toward the end of the fiscal year, chiefly in the corporate sector, from steeply rising energy prices, a slowdown in overseas economies and a rising yen.

With such conditions prevailing, the stock market showed gradual growth toward the summer supported by high stock prices in the U.S. and a weakening yen. At one point in early July, the Nikkei Index surpassed the 18,200 yen mark to set a new recovery high, exceeding that recorded in May 2000. But the market then moved rapidly into an adjustment phase because of financial market turmoil in Japan and overseas stemming from the subprime mortgage crisis in the U.S. and a stronger yen. In particular, an operating crisis faced by a major U.S. securities firm in the middle of March 2008 reignited concerns of a credit crunch. After dropping below 12,000 yen for the first time since summer 2005, the Nikkei Index finished the fiscal year under review at just above 12,500 yen.

The bond market began the period with 10-year government bond yields slightly below 1.7%, and the rate quickly rose to around 1.95% with a rise in long-term interest rates in the U.S. and stock prices at the beginning of July, thus signaling the start of an adjustment phase. From summer onwards, however, the rate decreased, due to increased risk aversion by investment funds globally and the Bank of Japan's decision to keep the interest rate unchanged. The yield had fallen to just below 1.3% by the end of the period under review.

Overseas, the growth rate of the U.S. economy increased up until the summer, fuelled by buoyant consumer spending and investment, along with a rise in exports. However, prolonged adjustment in the housing market and concerns about the subprime debacle affecting the whole economy led to a sudden decrease in the growth rate from the end of 2007. The European economy continued to grow, although the rate of growth decreased from summer 2007 as a result of delayed inventory adjustments. Amid such conditions, U.S. stock markets, and in particular large-cap stocks, continued to perform well as overseas economies remained strong into early fall, but financial system woes and the possibility of a recession brought on an adjustment phase toward the end of the fiscal year under review. Europe also entered an adjustment phase near the end of the period in step with the U.S. The bond market saw a temporary hike in interest rates in the U.S. at the start of the period under review, although the transition between summer and the end of the fiscal year was steady both in the U.S. and Europe against a backdrop of the trend in investment funds toward risk aversion and a substantial lowering of interest rates in the U.S.

Under these conditions, the Shinko Group posted consolidated operating revenues of ¥146.514 billion (99.8% of the previous year), ordinary income of ¥14.633 billion (50.4%), and net income of ¥9.404 billion yen (42.9%). An overview of these results follows.

(1) Commissions and fees received

Commission income for the fiscal year under review totaled ¥77.878 billion (85.5%). The following gives a breakdown of this income.

- Brokerage commissions

The average daily turnover during the fiscal year under review on Sections 1 and 2 of the Tokyo Stock Exchange was ¥2.8912 trillion (107.7%). Shinko's brokerage trading in terms of trading volume to 6,018 million shares (79.7%), and in terms of trading value to ¥6,637.3 billion (53.9%). As a result, the Shinko Group's brokerage commissions on equity trades totaled ¥27.196 billion (74.1%).

- Underwriting and selling fees

In the year under review, Shinko participated in the underwriting of 52 IPOs, lead managing 12 of them. Shinko was also involved in the underwriting of 22 secondary public offerings, lead managing 7 of them, and 8 REIT offerings, lead managing one of them. Consequently, the Group's underwriting commissions on equity totaled \(\frac{\text{\frac{2}}}{2.588}\) billion (36.5%).

Shinko also acted as lead manager for 21 issues of fiscal investment and loan program agency bonds, electric power bonds, and corporate bonds. As a result, the Group's underwriting commissions on bonds totaled ¥849 million (75.8%).

- Offering, selling, and other fees and commissions

This income principally comes from distribution commissions on investment trusts. In the fiscal year under review, Shinko introduced a range of new investment trusts to enhance its product lineup. New overseas equity investment trusts included Invesco Global Equity Open and the CROCI Global Sector Fund, which allow investors to benefit from growth in the global economy; the DIAM World Environmental Business Fund, which

invests in environmental businesses; and the New Growth China Equity Fund, Pictet Emerging Markets Income Equity Fund, and UBS Brazil Equity Fund, all of which invest in emerging markets. In the period under review, we also introduced the Nissay/Putnam High-Interest Currency Fund, which invests in overseas bonds, and the Japan Stock Leaders Fund, which invests in Japanese equities.

We also continued to promote existing investment trusts, focusing on dividend-paying investment trusts, which enjoy strong demand from individual investors, and investment trusts related to emerging markets with high economic growth rates.

As a result of these initiatives, offering, selling, and other fees and commissions totaled ¥18.316 billion (95.7%).

- Other fees and commissions

Other commissions include service fees for investment trusts, sales commissions for wrap accounts and annuity insurance, consultation fees for M&As and IPOs, and financial advisory fees related to real estate securitization. In the year under review, other fees and commissions totaled $\S28.797$ billion (107.2%).

(2) Trading profits

Net trading profits on equities totaled \(\frac{\pmathbf{\frac{4}}}{2.613}\) billion (157.3\), while those on bonds and other instruments totaled \(\frac{\pmathbf{\frac{4}}}{38.602}\) billion (113.3\). Total trading profits for the period therefore came to \(\frac{\pmathbf{\frac{4}}}{51.216}\) billion (121.6\).

(3) Financial profit/loss

Financial revenues came to \$19.725 billion (148.3%) while financial expenses totaled \$17.848 billion (148.3%). Net financial profit for the fiscal year therefore totaled \$1.877 billion (66.3%).

(4) Selling, general and administrative expenses

During this period, transaction expenses including advertising expenses increased, while office expenses, depreciation, etc., also increased. As a result, selling, general and administrative expenses reached ¥116.443 billion (103.5%).

(5) Extraordinary profits and losses

As extraordinary profit, we recorded, among other things, $\S2.052$ billion from the sale of investment securities, and $\S917$ million from sale of fixed assets. As extraordinary losses, we recorded, among other things, $\S1.778$ billion in merger expenses, and $\S1.483$ billion in write-down of investment securities. Thus, overall, we posted an extraordinary deficit of $\S718$ million.

2. Analysis of financial position

Net cash used in operating activities totaled ¥92.381 billion, reflecting a ¥444.45 billion yen expense due to an increased position in trading instruments and a ¥387.765 billion increase in loans receivable secured by securities, despite a ¥708.66 billion increase in loans payable secured by securities.

Net cash used in investing activities totaled ¥9.074 billion, reflecting a payment of ¥8.698 billion to acquire intangible assets, chiefly from systems investment, and a ¥7.468 billion payment to acquire investment securities, despite income of ¥10.739 billion from the sale and redemption of investment securities.

Net cash provided by financing activities amounted to ¥69.161 billion due to an increase in short-term and long-term borrowings and commercial paper.

As a result of the above, cash and cash equivalents at fiscal year-end totaled ¥87.654 billion.

3. Our basic policy regarding profit distribution and dividends for the current/next year

Shinko's aim is to maximize corporate value. We have thus adopted a flexible policy on profit distribution, under which we pay dividends to shareholders in line with business performance during the fiscal year in question, while striving to bolster the company's financial standing and boost retained earnings for future business development. In line with the above stance, we will propose a dividend of \mathbb{Y}10 per share at the general meeting of shareholders for the fiscal year under review. The dividend for next fiscal year will be determined based on a comprehensive analysis of business performance and financial position for the period.

4. Risk related to business, etc.

This section describes various risks related to the Shinko Group's business that may be of material importance to investors in making investment decisions. In addition, and with a view to actively disclose information related to matters that may be materially important to investors in making investment decisions, we have also disclosed below certain other matters not related to risk factors. The Shinko Group, aware of the implications of these risks, endeavors to avoid them, and strives to deal effectively with events arising as a result of such risks and other factors, should they occur. Some of the views presented below are related to potential future events, and it should be noted that such views are based on the Company's best judgment as of the release date of this financial report.

(1) Risk related to fluctuations in securities and other prices

(i) Risk related to trading operations

The Shinko Group is involved in the trading of various financial products, including derivatives. Fluctuations in stock prices, interest rates and exchange rates may affect the Group's business results and financial position.

(ii) Risk related to underwriting operations

The Shinko Group conducts underwriting operations for equities and bonds. When portions of these securities remain unsubscribed after offerings, this may affect their market price resulting in a loss on sale or appraisal. This has the potential to affect the Group's business results and financial position.

(iii) Investment securities

The Shinko Group purchases certain stocks and other investment securities with the intention of holding them for extended periods. Devaluations of investment capital and appraisal losses may occur in conjunction with falls in stock prices, and this may affect the Group's business results and financial position.

(2) Risk related to deteriorating creditworthiness of trading counterparties

Default and other problems at counterparties may result in losses due to nonperformance of swap contracts, impairment of bond principal on bonds held, delays in interest payments, and other factors. This may affect the Group's business results and financial position.

(3) Risk related to reduction in market size

Stock market slumps may result in a decline in transaction volumes and reductions in stock brokerage commissions. The primary market may also be similarly affected and may in turn, affect the Group's business results and financial position.

(4) Risk originating from subsidiaries

Shinko maintains certain subsidiaries, including Shinko Investment Co., Ltd., which conducts investment operations, Shinko Investment Trust Co., Ltd., which manages investment trusts, and Shinko Building Co., Ltd., which engages in real estate business activities. The performance and financial position of these subsidiaries may be negatively affected by changes in the economic climate and market conditions, or by other factors, and this has the potential to affect the business results and financial position of the Group.

(5) Systems risk and other operational risks

In accordance with its basic policy on systems risk management, the Group works to bolster security with the objective of preventing systems malfunction, improper or unauthorized computer use, and other incidents. However, incidents such as unauthorized access from external sources; fires, problems with electrical or communication lines, and other problems, depending on their scale, may interfere with the operations of the Group, and thus may affect our business results and financial position.

The Company works to ensure the availability of thorough operating manuals in all business areas, as well as to strengthen and enhance its compliance systems. However, negligence by executives and employees in carrying out responsibilities, accidents, improper dealings, or other negative incidents caused by executives or employees have the potential to generate losses and interfere with the operations of the Group. This may affect our business results and financial position.

(6) Risk related to legal compliance

The Shinko Group regards compliance as one of its most crucial managerial issues, and makes constant efforts to strengthen it. However, the violation of laws and regulations by executives or employees, whether intentional or unintentional, may damage our relationship of trust with clients. Moreover, the violation of laws and regulations by the Shinko Group as a corporation may result in orders from regulatory authorities that restrict or force us to cease

our operations, and this may result in lawsuits being brought against us by clients as well as the payment of damages. Such occurrences have the potential to affect our business results and financial position.

(7) Risk related to the management of client and other information

The Shinko Group strives to enhance awareness about how personal and confidential information should be managed among its executives and employees by establishing internal regulations and by providing education and knowledge. However, the leaking of client and other information has the potential to significantly damage the Group's reputation, and such a situation may affect our business results and financial position.

(8) Risk related to the lowering of credit ratings and the worsening of credit terms

The lowering of our credit rating by a rating agency could cause restrictions to be applied on terms for obtaining credit and increase costs associated with procuring capital and funds. This has the potential to affect our business results and financial position.

(9) Risk related to the capital adequacy ratio

Pursuant to the Securities and Exchange Law, securities companies are required to maintain capital adequacy ratios of 120% or higher. In the event that the Group is unable to maintain this capital adequacy ratio, it may be ordered to cease operations or be subject to other measures. Furthermore, should our capital adequacy ratio decrease significantly due to, for example, the posting of a loss as a result of a deterioration in the business environment, this may inhibit our ability to actively take risks in the pursuit of earnings and result in the Group foregoing profitable opportunities. The Company's operating activities may be affected as a result, and this has the potential to affect our business results and financial position.

(10) Changes in the legal system

The Shinko Group conducts its operations in accordance with regulations in effect at the time. Future changes to laws, regulations, political policies, customary practices, interpretations, or other social standards could result in situations that affect the execution of the Group's operations, and may affect our business results and financial position.

(11) Competition

In financial and capital markets in Japan, the shift from saving to investing is steadily accelerating and there is a transition toward market-based financial systems. This has led to the entry of companies from other industries into the market, adding to competition from within the securities industry, thus further intensifying competition. In the event that the Shinko Group is unable to establish a competitive edge in such an environment, the Group's business results and financial position may be affected.

(12) Retirement benefit obligations

The Group's employee retirement benefit costs and obligations are calculated according to certain assumptions regarding the discount rate and expected rate of return on pension assets, and other factors relevant to the calculation. In the event that actual results differ from assumptions due to, for example, a reduction in the yield on pension assets or a decline in their market values, or in the event that initial assumptions are altered, this will affect the future value of these costs and obligations.

(13) Event risk

The Shinko Group conducts business activities at branch and business offices both within Japan and overseas. Acts of terrorism, disasters, or other events may force the Group to discontinue part or all of its business activities. This may cause changes in the Group's business results and financial position.

(14) Merger with Mizuho Securities Co., Ltd.

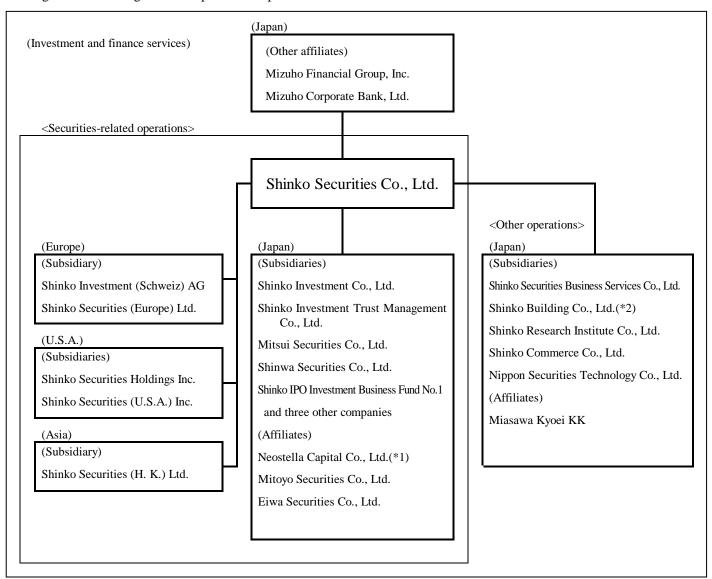

Shinko Securities and Mizuho Securities first extended the proposed effective date of the merger agreement between the two companies from January 1, 2008, to May 7, 2008, and then further extended it, targeting the earliest possible date in 2009. However, at the board of director meetings held at both companies on April 29, 2008, it was decided to cancel the merger agreement for the present and enter into an agreement through a letter of understanding for the merger, with a scheduled effective date of May 7, 2009. Although neither of the companies has changed policy regarding the merger and preparations are currently continuing to ensure the merger goes ahead without incident, problems with integrating IT systems or other unforeseen occurrences could cause problems in the merger, which could affect the Group's business results and financial position.

II. Our Corporate Group

Our corporate group is composed of 18 subsidiaries and 4 affiliates. The business activities of our company and of 13 of the subsidiaries and 3 of the affiliates consist mainly of trading securities, the commissioning of securities trading, the underwriting and selling of securities, offering and selling of securities, handling of private offerings, and other securities- and finance-related activities. We offer a wide range of services in the areas of raising and operating funds for customers. The other companies provide services related to and supportive of our company's activities, conduct market surveys and research, manage real estate, and more. Therefore, our corporate group's business activities all come under the single business segment of "investment and financial services."

All of our subsidiaries are consolidated companies, and the equity method is applied for all of our affiliates, except Misawa Kyoei KK.

Organizational Diagram of Corporate Group

- *1 CUBIC Venture Capital was renamed to Neostella Capital Co., Ltd. in February 2008.
- *2 Shinko Real Estate Co., Ltd. merged with Shinko Building Co., Ltd. in October 2007.
- *3 Shinko Principal Investment Co., Ltd. has been excluded from the scope of subsidiaries due to its action to allocate new shares to a third party.

III. Management Policy

1. Fundamental management policy

The Shinko Group's main line of business is in the securities (financial instruments) industry. We are a general securities company offering a diverse span of integrated functions from retail to wholesale. We will fulfill our role as a securities company in the Mizuho Financial Group, aiming to maximize synergies among group members and departments to provide high-added-value financial services to a wide range of customers.

2. Numerical targets

We have declared four medium-term management targets in our Fourth Medium-Term Management Plan to be attained by the end of March 2009. In pursuit of greater scale: (1) increase assets in custody to \(\frac{4}{20}\) trillion and (2) achieve ordinary income of \(\frac{4}{50}\) billion. In pursuit of quality: (3) achieve ROE of 10% or greater and (4) be rated 'A' or higher.

3. Medium- and long-term business strategies

The Group is currently taking initiatives in pursuit of the targets of the Fourth Medium-Term Management Plan, which runs from April 2006 to March 2009. This plan constitutes guidelines for increasing the efficiency of operations and maximizing the quality of services, amid various types of deregulation and system reforms, with the aim of further boosting productivity in the securities business and solidifying our position in the industry. An overview of the plan follows.

Overview of the Fourth Medium-Term Management Plan (April 2006–March 2009)

New corporate vision

The Client First—Act vigorously, act decisively, act boldly

Medium-term management targets

- · Expand scale: increase assets in custody to ¥20 trillion and achieve ordinary income of ¥50 billion
- · Further enhance quality: achieve ROE of 10% or greater and be rated 'A' or higher

Medium-term targets for profit-making divisions

Retail Division

- · Become the leading securities company for customer satisfaction
- · Achieve ¥12 trillion in retail assets under custody (by the end of March 2009)

Wholesale Division

- · Establish a position as the number one supporter of fresh, high-growth companies
- · Establish the five core businesses in investment banking:

IPOs: lead manage the most IPOs in the industry

Corporate finance: become one of the top three lead managers of corporate finance deals for companies with a market capitalization of less than \{100\ billion

M&A: achieve a top ten ranking in terms of the number of deals closed

Asset management: expand profits using new asset management business models

Investment funds: expand the funds business

Financial Products Division

Solidify market presence, and to this end, construct a system to increase market share to 5%

Review of performance during the fiscal year under review

During the period under review, the Shinko Group worked toward achieving the management targets set forth in the Fourth Medium-term Management Plan and strove to further expand its customer base, reform profit structure, and enhance quality in preparation for the merger with Mizuho Securities.

(Retail Division)

In the Retail Division, we took initiatives to dramatically expand the operating base and enhance quality under the basic theme of *taking action and innovating* in preparation for the new Mizuho Securities to begin operations. In the run-up to the merger with Mizuho Securities, we recognize that it is necessary to restructure sales to high-net-worth individuals to enhance productivity and establish a local presence through synergies between the Retail and Wholesale Divisions. Mindful of this, we established the Executive Planning Office, a new sales channel to cater exclusively for high-net-worth individuals, in all offices (apart from 5 branch offices and 3 sales offices) and enhance consultation sales through face-to-face interaction.

To better meet diversifying customer needs, we have tirelessly pushed ahead implementing suggestions from customers. Continued efforts to offer products, services and information exactly according to customer needs and the investment climate have generated steady profits from sources other than commissions on equity trades. In readiness for the commencement of the Electronic Share Certificate System (Paperless Share System) in January 2009, a committee was established within the company to handle the transition and is actively taking steps to enhance customer convenience, such as the *Shinko no tori* Stock Certificate Deposit Campaign.

In the year under review, the Shinko Group opened new offices in the Tokyo metropolitan area and Nagoya for the first time in four years (excluding offices shared with banks): branch offices in Omiya, Aratamabashi, and Fujigaoka. The Shin-Urayasu branch joined the Shinko network in April 2008. These new offices revitalize the image of securities companies, and their friendly atmosphere and pleasant layout allow customers to feel at ease when visiting for a consultation with staff.

(Wholesale Division)

In the Wholesale Division, we continued initiatives from the previous year to enhance marketing capabilities, strengthen the backup system, and nurture human resources.

In stock underwriting, we lead managed 12 IPOs, maintaining our performance among the best in the industry in terms of number of deals underwritten and underwriting participation rate, despite a significant reduction in the scale of the equity issues market. We also met a diverse range of funding needs for companies through public offerings. In bond underwriting, Shinko served as lead manager for many issues of fiscal investment and loan program agency bonds, electric power bonds and corporate bonds and achieved results in M&A through various measures such as leveraging external tie-ups.

(Financial Products Division)

In the Financial Products Division, we investigated risk hedging and investment management methods and worked to enhance trading capacity qualitatively and quantitatively in a bid to establish a firm presence in the market. Further, we reviewed organization structure and operational flow to enhance the support functions for the Retail and Wholesale Divisions. We also expanded our product lineup in investment trusts, insurance products and overseas and private structure bonds, and developed our ability to disseminate information.

In April 2008, we began offering the Shinko Fund Wrap fund management service with a contract amount of as little as ¥5 million, to add to the Long • AP Shinko asset management wrap first offered in December 2004.

(Corporate-related)

Shinko established a System Backup Center in Osaka Prefecture—one of the highest priority management projects—as part of the Business Continuity Plan. This system allows the entire flow of transactions to be backed up, from receipt of orders through to settlement. This system enhances business continuity in the event of a large-scale disaster affecting an extensive area, such as an earthquake, thus offering customers even more peace of mind for transactions.

In financial strategies, we entered into a syndicated commitment line to enhance liquidity in a bid to establish a stable and flexible fund procurement base.

In July 2007, Shinko Securities' rating was upgraded from single A minus (A-) to double A minus (AA-) by the Japan Credit Rating Agency (JCR), while sustaining a single A plus (A+) rating with Rating & Investment Information (R&I). Obtaining a rating of an A level or higher is one of the major business goals in the Medium-Term Business Plan, and we intend to push ahead with efforts to achieve higher rankings.

4. Our tasks to be solved

In financial and capital markets in Japan, the shift from saving to investing is steadily accelerating and there is a significant transition toward market-based financial systems. Fund procurement methods of companies are becoming more diversified through capital markets in Japan and overseas. Fund management is also seeing an expansion and acceleration of global money flow as a result of expansion in international diversified investment and the fund business. The Financial Instruments and Exchange Act came into effect in September 2007, which led to reinforcement of market function; and enhancement of market reliability, efficiency and transparency. This will have the effect of expanding the roles and responsibilities of securities companies as leaders in financial and capital markets. Our decision to merge with Mizuho Securities Co., Ltd, was based on this understanding of the environment. We firmly believe that combining the global platform of Mizuho's investment bank operations and Shinko's comprehensive full-service securities network throughout Japan will enhance our competitive edge and maximize shareholder value.

The schedule for the merger has been put back a number of times as a result of turmoil in global financial and capital markets resulting from the U.S. subprime housing crisis in 2007, which may have worried related government agencies, shareholders, and other investors. We are currently checking with Mizuho Financial Group Inc. and Mizuho Corporate Bank, Ltd., that there is no change in the merger plans of either of the companies involved or securities strategy of the Mizuho Financial Group.

Shinko acknowledges that the safe and sure implementation of the merger and posting solid business results to facilitate that are the most important issues. Accordingly, all employees and directors of the company will work together to make full preparations for the merger under the new schedule.

(Background to the merger with Mizuho Securities Co., Ltd., and policy going forward)

Both Shinko Securities and Mizuho Securities deemed that it would be appropriate to review factors such as the merger ratio in light of the effect on both companies of turmoil in global financial and capital markets resulting from the U.S. subprime housing crisis in 2007. Accordingly, the effective date of the merger was put back from January 1, 2008 to May 7, 2008 and preparations made. However, thereafter, the turmoil in global financial and capital markets continued with no sign of abating and uncertainty about the future remained. It was therefore decided at meetings of the board of directors at both companies on May 21, 2008, that the effective date of the merger should be put further back, targeting the earliest possible date in 2009, to protect the interests of shareholders and customers.

The conclusion was reached that May 7, 2009, would be a suitable choice for the new effective date of the merger, following detailed discussion and evaluation with related organizations such as Japan Securities Depository Center, Inc. and government agencies. This was done to ensure a smooth transition to the Paperless Share System, due to be introduced in January 2009.

The merger agreement was approved at the general shareholders meeting of both companies in June 2007. Nevertheless, because a considerable amount of time had already elapsed and it would be over one year until the effective date of the agreement, the companies decided to cancel the agreement for the present despite there being no change in policy regarding the merger. We further decided to enter into a new agreement following a review of the merger ratio and to present the new agreement to the general meeting of shareholders for review. This course of action will allow us to fulfill our duty of accountability and was judged to be in the best interests of shareholders. At board meetings at both companies on April 28, 2008, basic policy and matters relevant to the merger were confirmed. The merger agreement was canceled and a new letter of understanding for the merger signed.

Preparation for the merger thus far has been smooth, and we will continue working to ensure that the merger progresses without a hitch. Indeed, both companies have made considerable headway with preparations for integration of various operating sectors. A Project for Early Realization of Merger Effects (tentative name) will be established under the merger preparation committee with the presidents of both companies installed as joint-chairs. The Project will consider ways of realizing synergistic effects of the merger (e.g., personnel exchanges), where possible, in advance of the official merger.

Merger	deta	ils
-		

January 10, 2007	Memorandum of agreement entered into
March 29, 2007	Initial merger agreement entered into
June 28, 2007	Shinko Securities 118th Annual General Meeting of Shareholders
	(approval of the merger agreement)
November 5, 2007	Discussion commenced on matters such as the merger ratio
December 20, 2007	Effective date of merger put back to May 7, 2008
March 21, 2008	Effective date of merger put back once again to the earliest possible date in 2009
April 28, 2008	Initial merger agreement canceled
	Letter of understanding on the merger signed, due to take effect on May 7, 2009

[About Consolidated Financial Statements]

These consolidated financial statements follow the provisions of Ministry of Finance (MoF) Ordinance No.28 (1976) entitled "The Rules for Terms, Formats, and Preparation Method of Consolidated Financial Statements" (The Rules for Consolidated Financial Statements) and also comply with the provisions stipulated in Articles 46 and 68 of said ordinance. In addition, they are compiled in accordance with Cabinet Office Ordinance No.52 (2007) entitled "Cabinet Office Ordinance Concerning Financial Instruments Business" and the resolution entitled "Unification of Securities Business Accounting" adopted by the Japan Securities Dealers Association on 14 November 1974.

The consolidated financial statements for the previous period were prepared based on the unrevised Rules for Consolidated Financial Statements, whereas the consolidated financial statements for this period were prepared based on the revised Rules.

- 1. Matters regarding the scope of consolidation
 - (1) Consolidated subsidiaries (18 subsidiaries)

Major subsidiaries

Shinko Securities Business Services Co., Ltd.

Shinko Investment Co., Ltd.

Shinko Investment Trust Management Co., Ltd.

Nippon Securities Technology Co., Ltd.

(Excluded) Shinko Real Estate Co., Ltd.

Shinko Principal Investment Co., Ltd.

SPI Investment Business Limited Partnership No.1

2. Matters concerning the application of equity method

Equity-method affiliates (3 affiliates)

Neostella Capital Co., Ltd. (former CUBIC Venture Capital Co., Ltd.)

Mitoyo Securities Co., Ltd.

Eiwa Securities Co., Ltd.

Non-equity-method affiliates (1 affiliate)

Misawa Kyoei KK

3. Matters concerning the period of consolidated subsidiaries

The closing date of consolidated subsidiaries are as follows:

End of March 14 subsidiaries End of December 4 subsidiaries

For four consolidated subsidiaries with different closing dates to the consolidated closing date, financial statements as of each subsidiary's closing date were used. However, for important transactions that took place between the last closing date of each company and the consolidated closing date, adjustments necessary for the consolidation were performed.

- 4. Matters concerning the accounting standard
 - (1) Valuation method for significant assets
 - 1) Valuation method for securities classed as trading products (securities held for trading purpose):

 Securities and derivative contracts classed as trading products and held by the parent company or subsidiaries are recorded at present market value.
 - 2) Valuation method for securities not classed as trading products:

The following valuation methods are applied to securities that are not held for trading purposes:

a) Bonds that are to be held to maturity

The amortized cost (straight-line) method is used.

b) Other securities

Securities, etc. that have market values:

The present market value is recorded on the consolidated balance sheets and differences between this and acquisition cost is incorporated into the new asset in full. The selling price is based on the moving-average cost method.

Securities, etc. that have no market values

Valued using the moving-average cost method.

Moreover, with regard to contributions to investment business limited partnerships and similar partnerships (according to Article 2, Paragraph 2 of the Financial Instruments and Exchange Law, such contributions are regarded as negotiable securities), we use, as the book value, the value of our holdings of partnership assets as designated on the partnership's most recent statement of accounts that we are able to obtain as of the day - stipulated in the partnership agreement - on which the latest statement of accounts is reported. With regard to profit and loss obtained from the operations of the partnership, etc., we use a method whereby we record the value of our holdings.

(2) Depreciation methods used for significant depreciable assets

1) Tangible fixed assets

Both our company and domestic consolidated subsidiaries use mainly fixed-percentage depreciation. However, buildings acquired after 1 April 1998 (excluding the equipment, etc. they contain) are depreciated using the straight-line method.

(Additional Information)

In line with revisions in the Corporate Tax Law in 2007, the company and all consolidated subsidiaries in Japan apply a method of calculating the difference between the amount equivalent to 5% of the acquisition price and memorandum price with fixed amount depreciation over 5 years for assets acquired before 31 March 2007 that have reached 5% of the acquisition price through application of the depreciation method under the Corporate Tax Law before the revision. The affect of changeover on the profit and loss is minor.

2) Intangible fixed assets and long-term prepaid expenses

The straight-line method is used.

Moreover, software for our own use is depreciated using a straight-line method with the fixed amount of depreciation being determined by the duration of its potential internal use (up to 5 years).

(3) Accounting standards for significant reserves and allowances

1) Allowance for bad debts

In preparation for possible loss from bad debt in loans receivables, etc., allowance for general receivables is provided based on the ratio of past loss experience and also specific receivables such as non-recoverable receivables is provided for the estimated uncollectible amounts after reviewing collectability of receivables individually.

2) Reserve for bonus

To prepare for the payment of bonuses to employees, we calculated the estimated value of future payments and charged an appropriate portion of this obligation to the period.

3) Reserve for directors' bonus

To prepare for the payment of bonuses to directors, we calculated the estimated value of future payments and charged an appropriate portion of this obligation to the period.

4) Reserve for point service

To prepare for the cost burden for use of the Shinko Point Service in the future, the expected required amount is calculated for this period based on the usage rate.

Shinko Point Service commenced from October of 2006; and, the rational usage rate cannot be calculated; therefore, the amount reported for the end of this period is the amount equivalent to the total points given out to customers.

5) Reserve for retirement benefits

To prepare for the payment of employee retirement benefits, the amount considered to have arisen within the period was charged to the period on the basis of the estimated value of projected retirement benefit obligations and our pension assets at the end of this period.

Prior service cost is charged to expenses using the straight-line method based on determined years (10 years) within average remaining service year of the employees when incurred.

Actuarial differences are also charged to expenses from the following fiscal year using the straight-line method based on determined years (10 years) within average remaining service year of the employees

when incurred.

6) Reserve for directors' retirement benefits

To prepare for the payment of retirement benefits for directors, the necessary amount for the end of this period was posted in accordance with the inhouse regulations.

7) Reserve for executive officers' retirement benefits

To prepare for the payment of retirement benefits for executive officers, the necessary amount for the end of this period was posted in accordance with the inhouse regulations.

(4) Standards for translating significant assets or liabilities denominated in foreign currencies into Japanese yen
Foreign currency denominated claims and obligations are translated into Japanese yen at the spot rate
prevailing on the closing day of this period. Currency translation losses or gains are recorded on the income
statement as such.

The assets, liabilities, revenues, and expenses of foreign subsidiaries are also translated into Japanese yen at the spot rate prevailing on the closing day of this period. Any translation losses or gains are recorded in the net assets under the account "Foreign currency translation adjustment".

(5) Handling of significant lease transaction

In the case of finance leases where ownership is not deemed to have passed to the lessee, normal accounting procedures for leases are followed.

(6) Method of significant hedge accounting

In order to hedge our exposure to cash flow fluctuations caused by borrowing at variable interest rates, we enter into interest rate swap contracts. These are handled on a case-by-case basis.

(7) Accounting for consumption tax, etc.

The tax exclusion method is applied.

5. Scope of cash and cash equivalents included in the consolidated cash flow statement

The cash movements recorded in the consolidated cash flow statement are those of cash and cash equivalents. Assets classed as cash or cash equivalents are cash on hand, deposits for which no notice of withdrawal is required, and highly liquid short-term investments that carry next to no price risk and have a maturity of less than three months.

[Changes in Basic Important Matters for Preparation of Consolidated Financial Statements]

- In line with revisions in the Corporate Tax Law in 2007, "The treatment of depreciation for audit purpose at the
 present stage" (The Japanese Institute of Certified Public Accountants, Auditing and Assurance Practice Report No.
 81, April 25, 2007), that will be used from the business year ending on and after 1 April 2007, our company and
 all consolidated subsidiaries in Japan used this handling method from this period, and any assets acquired after 1
 April 2007 were changed over to the method based on the revised Corporate Tax Law. Thus, the affect of this
 change on the profit/loss is minor.
- 2. Financial contributions to limited partnerships had been recorded on "Investment securities" under "Fixed Asset"; however, with the increase in individual investments of recent years heightening its monetary importance, they were recorded as "Securities for sale, etc." under "Current Assets." With this change, current assets increased 6.744 billion yen and fixed assets decreased accordingly.

In line with the above, the profit/loss and expenses for limited partnerships, which had been allocated as "Non-operating revenues" and "Non-operating expenses," respectively, were allocated in "Profit or loss on securities for sale, etc.," resulting in an decrease in an operating profit by 124 million yen. Ordinary profit and net profit before taxes, etc. are not affected by this change.

Furthermore, in the consolidated cash flow statement, cash flow generated from investment to limited partnerships had been included in "Cash flow from investment activities", but were included in "Cash flow from operating activities" from this period.

[Changes in Indication Method]

Conventionally, securities owned for the purpose of trading investment by consolidated subsidiaries performing venture capital business had been included in "Investment securities for sale," but from this period, they were included in "Securities for sale, etc." under "Current assets" along with the investment to limited partnerships from this period.

In line with the above, the profit/loss and expenses generated from securities owned by consolidated subsidiaries performing venture capital that had been noted as "Trading profit or loss on investment securities for sale" under "Operating profit," which were renamed as "Profit or loss on securities for sale, etc." from this period.

[Notes to Consolidated Balance Sheets]

		Financial year to	Financial year to
		31 March 2007	31 March 2008
			(In millions of yen)
1.	Accumulated depreciation of tangible fixed assets	16,751	16,604
2.	Guarantee obligations	1,037	890
	(guarantee exercise anticipated)	(952)	(815)

In accordance with Report No.61 of the Auditing Committee of the Japanese Institute of Certified Public Accountants entitled "Auditing Procedures Concerning the Accounting for and Presentation of Guarantee Obligations and Similar", we recognize that we bear effective responsibility for guaranteeing our obligations and therefore provide a footnote giving details of these obligations.

3. Subordinated corporate bonds and borrowings

Among our corporate bonds and long-term borrowings (including those that mature within one year), there are the following subordinated obligations (corporate bonds and borrowings with special subordinating conditions) as defined in Article 2 of Cabinet Office Ordinance No.23 (2001) entitled "Orders Concerning the Capital Adequacy of Securities Companies".

		Financial year to 31 March 2007	Financial year to 31 March 2008 (In millions of yen)

	Financial year from	Financial year from
	1 April 2006 to	1 April 2007 to
	31 March 2007	31 March 2008
		(In millions of yen)
Cash and due from banks	121,197	89,788
Time deposits more than 3 months	-182	-2,133
Cash and cash equivalents	121,014	87,654

Segment Information

1. Business segment information

This corporate group is carrying out global business activities mainly for securities, which include (1) selling and buying securities, (2) brokerage of the entrustment of selling and buying securities, etc., (3) underwriting and selling securities, (4) handling the offering and selling of securities, and (5) handling the private offering of securities. These business activities involve providing financial and other services. We earn profit based on these business activities combined with such services. Therefore, the segment information on business types is omitted because our corporate group's business activities all come under the single business segment of "investment and financial services."

2. Geographical segment information

For this financial year and the previous financial year, the segment information on locations is omitted because each of the total operating revenue and assets of consolidated companies in Japan exceeds 90% of those in all segments.

3. Overseas gross sales (operating revenues)

For this financial year and the previous financial year, the overseas operating revenue is omitted because it is less than 10% of the consolidated operating revenues.

Market or Fair Values of Securities and Derivatives

Significant Post-Balance Sheet Events

Shinko Securities and Mizuho Securities have extended the effective date of merger involving the merger contract concluded on 29 March 2007, from 1 January 2008 to 7 May 2008, and re-extended to the earliest possible period in 2009.

The basic policy and conditions for the merger were reconfirmed and the initial merger contract was canceled at the general meeting of shareholders of the two companies held on 28 April 2008. A new Basic Merger Agreement was concluded with a new scheduled effective date of 7 May 2009.

Also at the meetings of board of directors held by both companies on 21 March 2008, discussion was held regarding the merger of Shinko Securities Holdings, Inc., our consolidated subsidiary, and Mizuho Securities USA Inc., a subsidiary of Mizuho Securities; and transfer of business of Shinko Securities (H. K.) Ltd., our consolidated subsidiary, to Mizuho Securities Asia Ltd., a subsidiary of Mizuho Securities, all of which being scheduled for 7 May 2008 will be extended to 7 May 2009.

Disclosure Omission

The need to disclose explanatory notes related to business combination, including lease transactions, transactions among related parties, tax effect accounting and stock options in the settlement report, is considered to be small and, therefore, will be omitted.

[Non-consolidated Financial Statements]

These non-consolidated financial statements follow the provisions of Ministry of Finance (MoF) Ordinance No.59 (1963) entitled "The Rules for Terms, Formats, and Preparation Method of Financial Statements" ("Rules for Non-consolidated Financial Statements") and also comply with the provisions stipulated in Articles 2 of said ordinance. In addition, they are compiled in accordance with Cabinet Office Ordinance No.52 (2007) entitled "Cabinet Office Ordinance Concerning Financial Instruments Business" and the resolution entitled "Uniform Accounting Standards of Securities Companies" approved by the board of directors of the Japan Securities Dealers Association on 14 November 1974.

The non-consolidated financial statements for the previous period were prepared based on the unrevised Rules for Consolidated Financial Statements, whereas the non-consolidated financial statements for this period were prepared based on the revised Rules.

[Basic Important Matters for Preparation of Non-consolidated Financial Statements]

1. Valuation method for securities

- (1) Valuation method for securities classed as trading products (securities held for trading purpose): Securities and derivative contracts classed as trading products are recorded at present market value.
- (2) Valuation method for securities not classed as trading products:
 - 1) Shares of subsidiaries and affiliates

The cost method by the moving-average method is used.

- 2) Other securities
 - a) Securities, etc. that have market values:

The present market value is recorded on the non-consolidated balance sheets and differences between this and acquisition cost is incorporated into the net assets in full. The selling price is based on the moving-average cost method.

b) Securities, etc. that have no market values

Valued using the moving-average cost method.

Moreover, with regard to contributions to investment business limited partnerships and similar partnerships (according to Article 2, Paragraph 2 of the Financial Instruments and Exchange Law, such contributions are regarded as negotiable securities), we use, as the book value, the value of our holdings of partnership assets as designated on the partnership's most recent statement of accounts that we are able to obtain as of the day - stipulated in the partnership agreement - on which the latest statement of accounts is reported. With regard to profit and loss obtained from the operations of the partnership, etc., we use a method whereby we record the value of our holdings.

2. Depreciation methods used for fixed assets

(1) Tangible fixed assets

The fixed-percentage method is mainly used.

However, buildings acquired after 1 April 1998 (excluding the equipment, etc. they contain) are depreciated using the straight-line (fixed amount) method.

(Additional Information)

In line with revisions in the Corporate Tax Law in 2007, the company apply a method of calculating the difference between the amount equivalent to 5% of the acquisition price and memorandum price with fixed amount depreciation over 5 years for assets acquired before 31 March 2007 that have reached 5% of the acquisition price through application of the depreciation method under the Corporate Tax Law before the revision. The affect of changeover on the profit and loss is minor.

(2) Intangible fixed assets and long-term prepaid expenses

The straight-line method is used.

Moreover, software for our own use is depreciated using a straight-line method with the fixed amount of depreciation being determined by the duration of its potential internal use (up to 5 years).

3. Accounting standards for reserves and allowances

(1) Allowance for bad debts

To prepare for possible loss from bad debt in loans receivables, etc., allowance for general receivables is provided based on the ratio of past loss experience and also specific receivables such as non-recoverable receivables is provided for the estimated uncollectible amounts after reviewing collectability of receivables individually.

(2) Reserve for bonus

To prepare for the payment of bonuses to employees, we calculated the estimated value of future payments and charged this obligation to this period.

(3) Reserve for directors' bonus

To prepare for the payment of bonuses to directors, we calculated the estimated value of future payments and charged this obligation to the period.

(4) Reserve for point service

To prepare for the cost burden for use of the Shinko Point Service in the future, the expected required amount is calculated for this period based on the usage rate.

Shinko Point Service commenced from October of 2006; and, the rational usage rate cannot be calculated; therefore, the amount reported for the end of this period is the amount equivalent to the total points given out to customers.

(5) Reserve for affiliate reorganization loss

In line with the commencement of closing procedures for Shinko Securities (Europe), the estimated amount of the cost burden involving office closing will be posted.

(6) Reserve for retirement benefits

To prepare for the payment of employee retirement benefits, the amount considered to have arisen within the period was charged to the period on the basis of the estimated value of projected retirement benefit obligations and our pension assets at the end of this period.

Prior service cost is charged to expenses using the straight-line method based on determined years (10 years) within average remaining service year of the employees when incurred.

Actuarial differences are also charged to expenses from the following fiscal year using the straight-line method based on determined years (10 years) within average remaining service year of the employees when incurred.

(7) Reserve for directors' retirement benefits

To prepare for the payment of retirement benefits for directors, the necessary funds for the end of period will be appropriated in accordance with the regulation.

(8) Reserve for executive officers' retirement benefits

To prepare for the payment of retirement benefits for executive officers, the necessary funds for the end of period will be appropriated in accordance with the regulations.

4. Handling of lease transaction

In the case of finance leases where ownership is not deemed to have passed to the lessee, normal accounting procedures for leases are followed.

5. Method of hedge accounting

In order to hedge our exposure to cash flow fluctuations caused by borrowing at variable interest rates, we enter into interest rate swap contracts. These are handled on a case-by-case basis.

6. Accounting for consumption tax, etc.

The tax exclusion method is applied.

[Change in Accounting Method]

- 1. In line with revisions in the Corporate Tax Law in 2007, "The treatment of depreciation for audit purpose at the present stage" (The Japanese Institute of Certified Public Accountants, Auditing and Assurance Practice Report No. 81, April 25, 2007), that will be used from the business year ending on and after 1 April 2007, our company used this handling method from this period, and any assets acquired after 1 April 2007 were changed over to the method based on the revised Corporate Tax Law. Thus, the affect of this change on the profit/loss is minor.
- 2. Financial contributions to limited partnerships had been recorded on "Investment securities" under "Fixed Asset"; however, with the increase in individual investments of recent years heightening its monetary importance, they were recorded as "Securities for sale, etc." under "Current Assets." With this change, current assets increased 8.726 billion yen and fixed assets decreased accordingly.

In line with the above, the profit/loss and expenses for limited partnerships, which had been allocated as "Non-operating revenues" and "Non-operating expenses," respectively, were allocated in "Profit or loss on securities for sale, etc.," resulting in a decrease in an operating profit by 1.74 billion yen. Ordinary profit and net profit before taxes, etc. are not affected by this change.

[Notes to Non-consolidated Balance Sheets]

[.votes to 1 ton consonance analysis shows]	Financial year to 31 March 2007	Financial year to 31 March 2008
1. Accumulated depreciation of tangible fixed assets	6,445	(In millions of yen) 6,154
2. Guarantee obligations	16,837	9,790
(guarantee exercise anticipated)	(16,752)	(9,715)

In accordance with Report No.61 of the Auditing Committee of the Japanese Institute of Certified Public Accountants entitled "Auditing Procedures Concerning the Accounting for and Presentation of Guarantee Obligations and Similar", we recognize that we bear effective responsibility for guaranteeing our obligations and therefore provide a footnote giving details of these obligations.

3. Subordinated borrowings

Among our corporate bonds and long-term borrowings (including those that mature within one year), there are the following subordinated obligations (corporate bonds and borrowings with special subordinating conditions) as defined in Article 176 of Cabinet Office Ordinance No.52 (2007) entitled "Cabinet Office Ordinance Concerning Financial Instruments Business".

	Financial year to 31 March 2007	Financial year to 31 March 2008 (In millions of yen)

- 2. The number of common stock held in treasury stock decreased by 476,000 shares. A decrease of 15,000 shares resulted from a request to increase a purchase of odd-lot shares, while a decrease of 461,000 shares resulted from the excretion of stock option rights.

Significant Post-Balance Sheet Events

Shinko Securities and Mizuho Securities have extended the effective date of merger involving the merger contract concluded on 29 March 2007, from 1 January 2008 to 7 May 2008, and re-extended to the earliest possible period in 2009.

The basic policy and conditions for the merger were reconfirmed and the initial merger contract was canceled at the general meeting of shareholders of the two companies held on 28 April 2008. A new basic agreement for the merger was concluded with a new scheduled effective date of 7 May 2009.
