

Opening of the Calgary Office

Mizuho Bank, Ltd. (MHBK; Yasuhiro Sato, President and CEO) opened an office in Calgary, Canada on October 15, 2013. This is our third office in Canada following offices in Toronto and Vancouver.

Western Canada has shown high growth rates in Canada in recent years on the back of increased production of shale gas associated with the revolution in development technologies. It is also a region of active investment by Japanese and other Asian resources-related corporations, with significant numbers of infrastructure development projects related to energy exports to Japan and other parts of Asia including facilities and ports. Calgary itself is also home to a high concentration of energy-related corporations including petroleum and natural gas.

Opening our office in Calgary enables MHBK to gather high-quality information on the energy sector, establishes a contact framework with local corporations and organizations, and further strengthens our ability to support our customers as they consider entering and expand their businesses in the local market.
