Mizuho Bank, Ltd.

Mizuho to Upgrade the Service Network in the United States

Mizuho Bank, Ltd. (President & CEO: Koji Fujiwara) will take further steps to consolidate management of the back and middle office operations of our branches in the United States to the New York Branch and further enhance our front office network. By streamlining operations, we can reinforce client-facing channels and improve our delivery of high-quality services in a reliable manner.

We have proceeded with the necessary preparations for transferring the information technology business support systems and administrative operations of the Los Angeles Branch to the New York Branch. This will improve our efficiency and enhance our ability to offer the same quality of service to clients across the country. As a result, the Los Angeles Branch can focus more on sales and client relationship management.

We have also taken the necessary preparations for opening a Dallas Representative Office under the New York Branch. Pending regulatory approval, our Dallas office will specialize in sales in a region that has attracted an increasing number of companies, including Japanese companies, in the recent years. The new location reinforces our commitment to a robust front office in service of the local Japanese subsidiaries as well as other companies.

By upgrading our service network in the United States, we will provide enhanced support to our clients as they pursue their business strategy.
