Unauthorized access to Eurekahedge's website system

Eurekahedge Pte. Ltd. (Chairman & CEO: Takashi Minagawa; headquarters: Singapore; "Eurekahedge"), a subsidiary of Mizuho Bank, Ltd. (President & CEO: Koji Fujiwara; "Mizuho Bank"), has announced that its website system suffered a data breach (Eurekahedge website: http://www.eurekahedge.com).

Please see the attachment for the details of the data breach as announced by Eurekahedge.

Eurekahedge is a hedge fund research and database provider serving corporate clients (mainly institutional investors) and so does not hold bank account numbers, PIN codes, passwords, or credit information.

Because the Eurekahedge system is independent of Mizuho Bank and Mizuho systems, there is no impact on other Mizuho group companies.

We apologize for any inconvenience caused by this incident.

Details of the data breach as announced by Eurekahedge

Eurekahedge Pte. Ltd. has become aware that it suffered a data breach due to a cyberattack from an external source. The data breach resulted in exposure of some client information through the Eurekahedge website system, which was accessed by an unauthorized party. The details are as follows:

1. Potential impact

a. Client information that may have been exposed:

- User name
- Email address
- Telephone number
- Country
- Interest in Eurekahedge products

The following applies to the users of paid services only (approx. 500 companies):

- Company name
- Title
- Service agreement with Eurekahedge (contract period and service fees)

b. Details of account exposure

At present, it has become apparent that a small number of accounts were exposed in the cyberattack. The maximum number of accounts that the attacker could have theoretically accessed through the website administrator screen is 120,000.

c. Date that the data breach was discovered

On August 8, Eurekahedge detected the unauthorized access to their website system and began an investigation.

2. Responses

- **a.** In order to prevent repeat attacks, Eurekahedge has already changed administrator ID passwords and enhanced security measures.
- **b.** The cause of the data breach is still under investigation.
- **c.** Eurekahedge has reported this incident to the local police.
- **d.** Eurekahedge will notify all clients registered as users about the incident through email and will caution them that they might receive suspicious emails or calls.
- **e.** Eurekahedge will thoroughly investigate the cause of the data breach and implement appropriate measures to prevent such an incident from happening again.

3. Contact for inquiries concerning the data breach
